

Pharmacognosy proposed practical list

- 1. To study the compound Microscope**
- 2. To study the morphological character of given drug Senna leaf**
- 3. To study the morphological character of given drug Ispaghula**
- 4. To study the morphological character of given drug Digitalis leaf**
- 5. To study the morphological character of given drug Cardamom**
- 6. To study the morphological character of given drug Fennel**
- 7. To study the morphological character of given drug Coriander**
- 8. To study the morphological character of given drug Caraway**
- 9. To study the morphological character of given drug Ajowan**
- 10. To study the morphological character of given drug Clove**
- 11. To study the morphological character of given drug Turmeric**
- 12. To study the morphological character of given drug Ginger**
- 13. To study the morphological character of given drug Nut-meg**
- 14. To study the morphological character of given drug Black pepper**
- 15. To study the morphological character of given drug Cinnamon**
- 16. To study the morphological character of given drug Asafoetida**
- 17. To study the morphological character of given drug Nux-vomica**
- 18. To study the morphological character of given drug Datura**
- 19. To study the morphological character of given drug Kurchi bark**
- 20. To study the morphological character of given drug Amla**
- 21. To study the morphological character of given drug Ashoka bark**
- 22. To study the morphological character of given drug Liquorice**
- 23. To study the morphological character of given drug Ashwagandha**
- 24. To study the morphological character of given drug Gokhru**
